How to review a scientific paper

Dr. Gunther Tress, Tress Academic

Date & Time:	30 April 2019 9 am – 5 pm
Location:	AWI Bremerhaven, room E-4025
Language:	English
Target group:	Postdocs PhD candidates (starting 3 rd year and beyond)
POLMAR credit points:	1
Registration:	info.polmar@awi.de

Course content:

The course trains you to review manuscripts for international peer-reviewed journals. You learn all relevant steps in the peer-review process. You will learn what editors expect from a reviewer and how to write a constructive review report that is helpful for the journal and the author. Numerous hands-on, workshop tasks help you analyse papers of your own choice and produce a review report. During the day, you will actively write a review report for a paper selected by you. Your review comments will remain strictly confidential. Learning to critically evaluate a paper well also sharpens up your own paper writing skills.

What you learn? You will get to know

- How does peer-review work
- What different types of review exist
- What are benefits and duties of reviewing
- Review ethics
- What do editors expect from reviewers
- What criteria to use to review papers
- How to write a review report
- Why are papers rejected
